

## Vermont Sun Upgrade

Vermont Sun has undergone a lot of renovation this summer. Both pools were completely repainted and a new pump system was installed. We are planning further upgrades to the pool heating system as well.

The men's locker room received new carpet, lockers, and paint. The main workout floor had the weight towers disassembled so we could install new carpet.

By thanksgiving we hope to have finished our grand, covered entry way project. Once you step off the parking lot, your way into Vermont Sun will be under a beautiful, lighted cover!

Now we would like some input. We are going to expand the main workout floor by 600 to 800 square feet. The expansion will include a bathroom for your convenience when you are on the floor. We have some ideas for the rest of the space but, as always, the club is for our members and we'd love to hear what you'd like to have! Input from our members determines what shapes Vermont Sun!

Thank you,  
Vermont Sun
